

INSTRUCTION OF CLASSICAL BATH

MODEL:F-210

SIZE:1700×775×775mm

1. **Specialities:** The surface is brightness. The fitting is perfect, luxury and top grade. It is easy for user to complete the installation alone in a short time.

2. Installation Step:

- ① Open the packing and place it carefully to assure not crash or scrape the surface of bathtub.
- ② Put the bathtub in the place horizontally where you want to install. Adjust the feet under the bottom of tub to achieve the ideal state.
- ③ Joint the drain and the drain pipe well. Use the tube which is prepared to every tub, to joint the drain and the drain pipe if there is distance between the two drain equip. Flex the length and angle if necessary to make sure drain pipe can be connected well with the cloacae.
- ④ Take off the lid before inversing the tub in case the lid falls down to floor and be scraped. It should be underlay something soft on the floor to protect the surface of the bathtub.

NOTICE:

- ① Don' t fill the bathtub with boiling water directly. It should be filled cold water first and then fill with hot water. Or fill it with warm water directly.
- ② Please it from being crashed or scraped by hard article.
- ③ Please it from drastic acidity and alkali things.
